As Featured in "Commerce Magazine"

A Preliminary Assessment conducted for an Industrial Establishment located in East Windsor, Mercer County, New Jersey identified 44 areas of concern (AOCs). Whitestone's Chris Seib, LSRP confirmed that no further action was required for the majority, however, SI was deemed necessary to address three AOCs. Using the data, Whitestone's Chris Seib, LSRP calculated a site-specific IGW Soil Remediation Standard for historic agricultural impacts to shallow site soils. These efforts allowed an Unrestricted Use Response Action Outcome to be issued for the entire Industrial Establishment within months of award of the project. This quick turnaround of the RAO ensured the ISRA-subject transaction would occur prior the client's required deadline.

Environmental
Services*

Environmental Services

Negotiating the complexities of environmental regulations can be challenging and time consuming. Whitestone relies upon demonstrated experience and knowledge of local conditions and regulations to deliver solutions that are timely, practical and cost-effective.

Geotechnical Services

Design and construction of functional and cost-effective structures require a thorough understanding of local soil, rock and groundwater conditions. Whitestone provides a wide range of geotechnical services to support all phases of a project, from initial site evaluation through construction.
