Featured Project

Whitestone identified multiple environmental and geotechnical considerations and provided recommendations to civil design and construction professionals to concurrently remediate and redevelop this former orchard site. Whitestone also provided full-time construction phase testing and inspection, health and safety monitoring, and remediation management services for this 220 acre retail development project. Understanding On-Site & Off-Site Soil Re-use & Management Options

Whitestone specializes in site development and redevelopment issues including management of excess soils during redevelopment. By combining our environmental regulatory expertise with geotechnical engineering skills,

Whitestone can provide cost-effective and regulatory-compliant programs for soil/fill re-use and management.

Special Inspection Services

Make sure your Special Inspections are conducted by properly trained and certified inspectors. Failure to do so could result in costly delays to the start or completion of your project. [Click here for additional information regarding Special Inspections.](#)

Geotechnical Services

Design and construction of functional and cost-effective structures require a thorough understanding of local soil, rock, and groundwater conditions as well as building code regulations. [Click here to learn how Whitestone can help.](#)

Environmental Services

Negotiating the complexities of environmental regulations can be challenging and time consuming. [Click here to learn how Whitestone can help.](#)
